- **Total plate load:** 86.2 kg.
- **Weight:** 178 kg.
- **DIMENSIONS:** Length: 124.5 cm x Width: 102 cm x Height: 150 cm.

The painting process of the machines is carried out in a four-layer treatment tunnel, which offers an absolute guarantee against corrosion. In the first layer we proceed to degreasing and hot phosphating. The second is a prephosphating at room temperature. In the third, hot phosphating is carried out. And finally, the structure is covered with epoxy powder paint.

Counterbalanced arms. They cancel the weight of the part of the structure to be moved, to lift only the selected weight with the plates.

Use of cam system to develop a uniform weight. Maintains the strength arm with constant resistance throughout the stroke.

The plates are made of calibrated steel, painted black, they have rings of Teflon of superior quality, which produces a correct sliding and avoids noise due to friction.

Adjustments of the seat, backrest and padded rollers. It allows the adaptation of the machines to any user and helps to perform the exercises with the correct posture.

With our line of Binom Force Machinery you will achieve the best results for you and your clients.

All of our BINOM Machinery is manufactured with the highest design and quality controls to offer our customers the best quality at the best price.
