Description

Binom Steel - Plate Loaded BSL108 Squat Lunge - 100% Professional

The Squat Lunge BSL118 machine from Binom is designed to provide stability and enhance the body's explosive strength, ensuring that the user maintains a solid position on the floor. With its robust and versatile design, this equipment allows you to perform a wide variety of exercises to strengthen both the upper and lower body. From squats to lunges, its powder-coated chassis ensures maximum resistance and durability, while its independent arms offer the flexibility to work each side separately or both simultaneously. With the capacity to support up to 100 kg on its 4 disk supports and 2 storage hangers, this binom is the ideal choice to take your training to the next level.

We are more than confident in saying that with the choice of this machine, your investment will be guaranteed with a **100% reliable and accurate product**. With all necessary spare parts in stock. You'll be able to save space and money. The entire biomechanics of this machinery has been created by the best engineers and trainers to isolate the muscle in the most efficient way.

Binom Steel Plate Loaded BSL108 Squat Lunge

GENERAL FEATURES

This professional machine has been carefully designed to offer users a versatile range of training options. It incorporates various loading points and grip positions strategically arranged to adapt to different strength curves. Additionally, with its independent arms, it allows working each side of the body individually, providing the opportunity to perform unilateral exercises and further customize your workout routine. Our Steel line is designed for high resistance to work, with finishes and design created to be the best choice for your gym. **The machines include:**

- Chassis with **ultra-reinforced structure**.

- **High-quality steel** Q325.
- Finishes in steel most resistant on the market.
- **Free exercise switch** with double functions that make the exercise much more comfortable.

Our Squat Lunge disk loader is recognized in the fitness world for its high quality and reliability, our products being a benchmark for having the best response to intensive use. Being a professional disk loading machine, you can give it a very high performance without any of its components suffering the least.
