

Plate Loaded BSL125 Isolateral Low Row

Product Images

Description

Binom Steel - BSL125 Plate Loaded Low Row Isolateral - 100% Professional

The **Binom Steel BSL125 Plate Loaded Low Row Isolateral** is a strength training machine designed specifically to work the muscles of the back and arms, simulating a rowing movement with adjustable plate loading. With an ergonomic and isolateral design, it allows both sides of the body to work independently, providing balanced and effective muscle development. Its robust structure ensures stability and durability, ideal for advanced users seeking precise and high-performance training.

We are more than confident in saying that by choosing this machine, your investment will be guaranteed with a **100% reliable and precise product**. All necessary spare parts are in stock. You'll save space and money. The biomechanics of this machine have been designed by top engineers and trainers to isolate the muscle in the most efficient way possible.

Binom Steel BSL125 Plate Loaded Low Row Isolateral

GENERAL FEATURES

The Binom Steel allows users to experience the same range of motion and feel as free weights, but with the safety of a machine. Its divergent lever arms work independently, allowing muscle isolation and contraction for a more efficient workout. The machines include:

- Chassis with an **ultra-reinforced structure**.
- **High-quality steel** Q325.
- Most resistant steel finishes on the market.
- **Free exercise change** with dual functions, making workouts much more comfortable.

Our plate-loaded low row isolateral machine is recognized in the fitness world for its high quality and reliability. Our products are a benchmark for offering the best response to intensive use. As a professional plate-loaded machine, you can achieve maximum performance without any of its components suffering the slightest damage.

TECHNICAL FEATURES

- Designed to isolate and strengthen the latissimus dorsi, biceps, and trapezius muscles.
- Structure: Main frame oval tube 50 x 100 mm.
- Material: High-quality steel.
- Each arm of the machine works independently to achieve the best muscle isolation and contraction.

- Includes 4 storage bars, each supporting 100 kg.
- High-quality aluminum bars with a capacity to support up to 100 kg.
- High-performance industrial bearings.
- Seat with hydraulic adjustment up to 13 positions.
- Suitable for 50 mm diameter plates.
- Robust construction with a 3 mm tube thickness.
- Maximum user weight: 180 kg.
- Weight: 133 kg.
- Packaging dimensions: 162 cm x 112 cm x 57 cm.
- **DIMENSIONS:** Length: 139 cm x Width: 137 cm x Height: 169 cm.

All BINOM machinery is manufactured with the highest design and quality controls to offer our customers the best quality at the best price.
