Description

Binom Advanced BA231 Hip Thrust - 100% PROFESSIONAL

The **Binom Advanced BA231 Hip Thrust** is a machine designed for specific glute and hamstring training, offering a robust and efficient structure. Made of high-strength steel, it ensures stability and safety during exercise. Its ergonomic design allows for a comfortable and effective movement execution, reducing the risk of injury and maximizing muscle activation. Additionally, it features a padded support system that provides comfort to the user during the workout.

We are more than confident in telling you that with the choice of this machine, your investment will be guaranteed with a 100% reliable and precise product. With all necessary spare parts in stock, you can save space and money. The entire biomechanics of this equipment has been created by top engineers and trainers to efficiently isolate the muscle.

Binom Advanced BA231 Hip Thrust

GENERAL FEATURES

This machine has a maximum load capacity of 150 kg, making it ideal for both beginners and advanced athletes looking to progress in their strength training. Its solid structure and high-quality materials ensure durability and resistance to intensive use in personal training spaces. Thanks to its functional design, it allows for easy loading and unloading of weight plates, optimizing the user experience.

Binom Fitness is our brand. Recognized in the fitness world for its high quality and reliability, our equipment takes pride in delivering the best performance under intensive use. These are strength training machines that, with minimal maintenance, will bring satisfaction for a long time.
