Description

Binom Steel - BSL166 Plate Loaded Leg Curl - 100% PROFESSIONAL

The Binom Steel BSL166 Plate Loaded Leg Curl is a strength training machine designed to specifically target the hamstrings and glutes with total safety. Its plate-loaded system allows progressive resistance selection, adapting to any training level, from beginners to advanced athletes. With a robust, ergonomic, and professional-grade structure, it guarantees stability and durability even during intense sessions.

It features 2 bars designed for plate loading and 2 additional ones for storage, providing convenience and organization for daily use. It also includes cushions made with high-density foam and covered in premium leather. With a maximum load capacity of 200 kg, this machine ensures safe and efficient professional-level training.

We are more than confident in saying that by choosing this machine, your investment is guaranteed with a 100% reliable and precise product. All spare parts are available in stock. You will save both space and money. The biomechanics of this equipment has been developed by top engineers and trainers to achieve maximum muscle isolation in the most efficient way.

Binom Steel BSL166 Plate Loaded Leg Curl

GENERAL FEATURES

Experience excellence in your training routine with the BSL166 Plate Loaded Leg Curl. With its robust design and plate-loading technology, this equipment provides a workout that maximizes muscle development and stability throughout the exercise. The machines include:

- Chassis with ultra-reinforced structure.
- High-quality Q325 steel.
- Market-leading reinforced steel finishes.

Built to withstand the most intense use, our plate-loaded machines combine resistance and precision in every movement, ensuring safe and efficient training. With top-quality materials and a robust design, they are the ideal choice for those looking to maximize performance without compromising durability.

Our plate-loaded leg curl is recognized in the fitness industry for its high quality and reliability. Our products are a benchmark for withstanding intensive use without any component suffering the slightest wear. Being a professional plate-loaded machine, you can push it to its maximum performance with no compromise.
