Description

Binom Steel Pro BSP04 Selectorized Lateral Raise Machine - 100% Professional

The Binom Steel Pro BSP04 Selectorized Lateral Raise Machine is designed to allow each repetition to be performed in a safer, more efficient way, with no downtime between users. Its guided movement specifically targets the lateral deltoid, eliminating swinging and compensations, making it easy to integrate this exercise into intense training routines. It is, without a doubt, one of the most effective ways to build wide, well-balanced shoulders.

Its design ensures a smooth and controlled movement, maximizing muscle activation with every repetition. It is an ideal option to combine performance, comfort, and versatility, suitable for both beginners and experienced users.

As part of the Binom Steel Pro line, this machine stands out for its robust construction, reliability, and design built to withstand intensive use in professional gyms, offering a comfortable, smooth, and long-lasting training experience.

We are fully confident in saying that by choosing this machine, your investment is guaranteed with a **100% reliable and precise product**. With all necessary spare parts in stock, you can save both space and money. The entire biomechanics of this equipment has been developed by top engineers and trainers to isolate the muscle in the most efficient way.

Binom Steel Pro BSP04 Selectorized Lateral Raise Machine

GENERAL FEATURES

This equipment has been developed to ensure ergonomic adjustment and controlled technique. The **seat features 5 adjustment positions**, allowing proper alignment of the shoulder joint with the axis of movement. The rotating handles and pads are designed to accommodate users of different sizes, ensuring a safe, stable, and efficient posture throughout the entire range of motion. This machine is perfect for both dedicated shoulder routines and complementary exercises within strength or hypertrophy programs.

The Binom Steel Pro line allows users to experience the same range of motion and feel as free weights, but with the safety of a selectorized machine. **The machines include:**

- High-quality nylon pulleys.
- Ultra-reinforced frame structure.
- High-resistance cables designed for intensive use.
- Magnetic weight selector pin for quick and safe adjustments.
- Advanced manufacturing with laser cutting, robotic welding, and a highly durable anti-corrosion finish.

Thanks to its **unilateral movement system**, users can train each arm separately or both simultaneously, correcting imbalances and refining technique. Its guided design keeps the body stable, focusing the effort on the lateral head of the deltoid to strengthen the joint and visually widen the shoulders.

With a **weight stack of 117 kg + 4.6 kg**, it allows for quick and precise load adjustments. A powerful and reliable option for gyms seeking high performance without compromising training flow.

Our guided-load machines stand out for their **high quality and reliability**. Our products are recognized for

delivering excellent performance under intensive use. As a professional-grade machine, it can deliver outstanding performance without any component experiencing unnecessary strain.

TECHNICAL SPECIFICATIONS

- Structure: Main frame flat oval tubes of 65 × 114 mm and 40 × 70 mm.
- Robust construction with 3 mm tube thickness.
- High-performance industrial bearings.
- Front frame: D-shaped tube of 76 × 130 × 3 mm.
- 114 mm nylon pulley for smooth and quiet movement.
- Weight plates: 1 pc x 5 kg + 16 pcs x 7 kg + 2 additional pcs x 2.3 kg.
- Total weight stack: 117 kg + 4.6 kg.
- Material: High-quality Q235 steel.
- 5-position adjustable seat.
- Weight: 282 kg.
- Maximum user weight: 200 kg.
- Packing dimensions: 162 cm x 122 cm x 75 cm.
- **DIMENSIONS:** Length: 122 cm x Width: 122 cm x Height: 160 cm.

All BINOM machinery is manufactured under the highest design and quality standards to offer our customers the best quality at the best price.

Additional Information

Product line	Steel
Use	Profesional
Condition	New
Total Dimensions (cm)	L: 122 cm × W: 122 cm × H: 160 cm.
Machine Weight (Kg)	282 kg.
Total Weight of Plates	117 kg + 4.6kg.
Available on	30 Jul 2026
